

# WB FILLER

## PRODUCT INFORMATION

### GENERAL DESCRIPTION

- Fast drying, water-based gap filler designed to fill joints and gaps in wooden floors.
- VOC-content = 0.
- Particularly suitable for industrial parquet and patterned floors such as herringbone flooring.
- Mixed with sanding dust, the filler can be used to fill gaps up to 2 mm wide.
- Not suitable for plank floors, older floors with wide joints, sprung floors, or nailed/screwed floors, as the dry filler may crack under these conditions.
- WB Filler can be used in combination with Junckers floor oils and lacquers.
- GEV-EMICODE: EC1<sup>Plus</sup> - Very low emission.

For professional use.

### PRODUCT DESCRIPTION

**Product:** One-component acrylic dispersion.

**Package sizes:** 5 litres / 6 kg.

**Appearance:** Dries to the same colour as the added wood dust.

### TECHNICAL DATA

**Coverage:** Approx. 20 m<sup>2</sup> per litre. Consumption will depend on the size of the joints and absorption capacity of the wood.

**Before application:** Shake well before use.

**Mixing of sanding dust:** 10 % by weight for smoothing and up to 20 % for gap filling.

**Application tools:** Broad full-edged spatula of stainless steel.

**Substrate temperature:** Minimum 15 °C.

**Dilution:** Not recommended.

**Drying time at 20 °C and 50 % RH:**

Sanding: Approx. 60 minutes.

Fully dried after 5-6 hours.

**Cleaning of tools:** Water immediately after use.

**Storage:** Lasts for 18 months if unopened and stored at 20 °C. Not to be exposed to temperatures below 5 °C. If the container has been opened, dry particles may form in the liquid. Use a sieve to filter these out before use.

## DIRECTIONS FOR USE

### Untreated/sanded floors:

- Ensure that the surface is clean, dry and free from dust, wax, oil, lacquer, grease, polish and soap residues.
- The final sanding before application should be carried out with 120-150 grit sandpaper.
- Mix sanding dust into the filler until a thick but spreadable paste is obtained.
- It is recommended to use sanding dust from a single or multi rotary-sanding machine. Dust from a belt sander is not suitable.
- Spread the paste using a stainless steel spatula.
- When dry, sand with 150-180 grit sandpaper.
- Note that low temperatures, high relative humidity and poor room ventilation can significantly increase drying time, as will gaps larger than 2 mm.
- Vacuum thoroughly and proceed with oil or lacquer application.

---

## PRECAUTIONARY MEASURES

Before using the product, read the label on the container carefully and observe the recommended precautionary measures. See Safety Data Sheet for detailed information.
